

- **Apply Step 1 Lash Lifting Lotion:** using a microfibre brush, do not apply any further than halfway up the lash lift shield.
- Processing times can range from between **5-8 minutes** depending on the texture of the natural lashes
- Once you're happy with your lash lift lotion application place a clean dry cotton pad on each eye & cover with a hand towel
- Once processing time is up, remove Step 1 lotion using a clean, dry cotton bud
- Repeat applying **Step 2 Fixing Lotion** as explained above
- Once processing time is up remove Step 2 lotion using a clean, dry cotton bud
- Apply the nourishing lash lift lotion using a cotton bud, wait for 5 minutes, by this time the lashes will be nourished & ready to be removed from the lash lift shield
- Using a damp cotton pad gently cleanse the lashes ensuring all lotions have been removed
- Apply a damp cotton pad behind the lash lift shield, gently releasing the shield from your clients eyelid to reveal your gorgeous lifted lashes!
- Final step Tint the client's lashes with your chosen tint, we recommend approx 10 minutes (refer to your manufactures guidelines for tint timings)
- Please Note: To check in on your client throughout their treatment to ensure they are comfortable & there is no irritation if your client is uncomfortable please stop the treatment immediately & remove any lash lift lotions

Always check:

- Lash Lift Lotion has not come in contact with the skin if this happens please remove it with a cotton bud
- The solution has not been applied to high on the lash lift shield as this will over curl the lashes
- It's important to understand that where you apply the lotion will have a direct effect on the lash lift result.
- Do not rush this process!

Continued...

- Lash Lift lotions correctly placed will produce beautifully lifted lashes without being over curled
- The lash lift lotion should start just where the lashes start touching the shield, allow **0.05 - 1mm** gap from the root of the lashes ensuring the lash lift lotions do not come into contact with the skin!
- The area covered should just be enough to create the lift. You should look from the top and the side as you carefully apply the lift lotion to ensure the correct coverage

Client Aftercare;

- Avoid rubbing the eyes
- Avoid your lashes coming into contact with water for 24 x hrs
- Avoid sunbeds for 24 x hrs
